Sub: Offer for Feasibility studies on Interaction of Thermal Plasma with Fly Ash

Dear Sir,

This is in reference to your email dated-13.02.2017 and our meeting at FCIPT on 01.03.2017 with your requirement to conduct feasibility study on interaction of thermal plasma with Fly Ash.

We have worked out a feasibility study proposal based on our expertise and available background information to fulfill your requirement.

As per the proposal, we will conduct experiments on interaction of thermal plasma with Fly Ash to investigate the possible production of SiAlON. A detailed project report with results will be submitted to M/s ABREF Pvt. Limited after completion of the project. Once the study is completed successfully and if positive results are obtained, we shall work out for scaling up the process as per requirement.

Hope the attached proposal is in line with your requirement. Please feel free to call us for any further information that you may require.

Thanking you and looking forward to a fruitful collaboration ahead.

With best regards,

Anand Visani
T. C. Cell

PROPOSAL:

This proposal is for feasibility study on interaction of thermal plasma with Fly Ash. A dc non-transferred nitrogen thermal plasma torch will be developed and fly ash will be introduced into the thermal plasma plume. The treated product will be collected downstream and investigated for the possible production of SiAlON.

METHODOLOGY OF EXECUTION:

Execution of this proposed work will be done in following steps:

- A 10 KW– 25 KW dc plasma torch will be fabricated using carbon (graphite) electrodes and installed on a chamber that will be initially evacuated to vacuum ~10 mbar. Nitrogen will then be flushed to maintain atmospheric pressure.
- Appropriate arrangement/provision will be done to inject the cold gas and/or fly ash into the plasma plume.
- Studies will be conducted at different power levels (up to 25 kW) and flow of plasma generating gas and rate of fly ash introduction.
- Treated sample will be collected downstream and tested for presence of SiAlON.
- The same experiment will be tried by taking a mixture of alumina, silica and carbon in a carbon crucible and treated by transferred arc plasma method.
- Powders obtained from both the above methods will be characterized by XRD for the possible presence of SiAlON.
- In the event of the presence of SiAlON, phase identification will be checked by XRD and shape and size of grains by SEM.
- A report will be submitted to M/s ABREF Pvt. Ltd. containing details of the studies conducted and results obtained.

SCOPE OF WORK:

The scope of work is described below:

FCIPT's scope of work:

- ❖ Studies on the interaction of Fly ash with Nitrogen Thermal Plasma.
- ❖ Collection of treated powder and explore the presence of SiAlON.
- ❖ Testing of the collected powder using XRD and SEM for phase identification and shape and size of grains respectively.
- ❖ Preparation and submission of project report.
- ❖ Optimization of conversion efficiency of Fly Ash or Alumina+Silica+Carbon powder mixture to SiAlON is NOT in the scope of this feasibility study.

ABREF's scope of work:

- ❖ Supply of Fly Ash, and good quality Alumina, Silica and Carbon powders.
- ❖ Any other activity, that is required for the proposed project but is not under FCIPT's scope of work.

DELIVERABLES:

Technical report which includes experiment procedure followed in the study and results of the experiments.

TIME SCALES:

The time required for conducting the proposed experiments shall be 6 months from the date of receipt of advance.

COST:

The charges for activities under FCIPT scope of work are as given below:

Sr. No.	Activity	Amount in Rs.
01	Charges for Feasibility study (including, experiments charges, analysis charges, manpower, overheads and consumables & contingencies charges)	3,00,000/-
TOTAL OF ABOVE Rupees Three Lakhs only		3,00,000/-

TERMS & CONDITIONS:

1. Payment terms:

- a. 80% as advance payment along with P.O. / Agreement
- b. 20% against Submission of final technical report.
- c. All payments to be made in favor of **INSTITUTE FOR PLASMA RESEARCH (A/c FCIPT)**, Gandhinagar.

2. Validity of quote: 30 days from date of offer/proposal

3. Tenure: 6 months from the date of receipt of advance payment.

4. Intellectual Property (IP):

All the background intellectual property held by both the organizations will be held confidential respectively by each other. Any intellectual property relating to plasma processing system and processing, as generated out of this project shall be a property of the Institute for Plasma Research. Replication or unauthorized copying / reproduction is not permitted.

5. Force Majeure:

FCIPT will not be responsible for any delay in executing the above proposed activity due to any reasons beyond its scope of control such as war, epidemics, natural disasters, labour problems/strike at our – our supplier's works, acts of GOD, or delay due to attaining test results of processed material, or any activity of other party linked with FCIPT's scope etc.

6. Liability:

FCIPT shall not be liable for any failures whether financial, technical or whatsoever, arising out of this agreement. M/s ABREF Pvt. Ltd. has been made aware and accepts that the scope of work under this agreement is purely research and development type and FCIPT will not be responsible for any loss arising due to use of such treated effluent. M/s ABREF Pvt. Ltd. shall not hold FCIPT liable for any damages, demands, expenses or losses asserted by M/s ABREF Pvt. Ltd. Limited or third party out of this agreement.

Dear Mr Kamak,
IAEA dis-burses money in instalments. The first instalment
6 mths of 3500 Euros came in Dec 2010. Subsequently the remaining
3500 Euros + 3750 Euros of renewed contract were disbursed in 2012
Similarly we have received 3750+3750 Euros in 2013 and 3750+3750 Euro
in 2014 and then 3750 Euros + 5000 Euros for 2015. Closed in Jan 2016
Please be tactful when discussing with others...I got your rise through in better times. No-one else can get it.
Apparently we are hugely overdrawn in Human Health. Frankly you well deserved a rise given the recruitment and
numbers of patients you must have on follow up, but others are doing very well too now, and won't get extra
ly we are going to stop any payments to the very low recruiting sites which will provoke walls - but to be honest
everyone had payments for many years when they weren't recruiting, and we can't go on paying sites who are sta
tuting fewer than 5 patients a year.

My very best wishes, and thank you for being such excellent recruiters.

Ken

Subject: Application for seed grant under the western India research consortium for collaborative studies with IIT-B

Dear Sir,

I would like to submit a collaborative research proposal with IIT-B (Rinti Banerjee- Biomedical engineering group) for the above seed grant. This research proposal aims at **evaluating a mucosal nanoparticle-in-gel system for regional delivery of radio-sensitizing agents in an oral cancer xenograft model**. We had initially done a collaborative research project involving paclitaxel alone earlier and the results of the study has been submitted to a peer reviewed nanomedicine journal. Now we want to take this work forward by using dual drug combination in a liposomal gel formulation for loco-regional drug delivery. This study will be initially a proof of concept study. Once we get the desirable results we would like to scale it up and do phase-1 studies in humans.

I am herewith attaching the project proposal for your perusal and suggestions

At the same time I request you to help us by funding the project with the seed grant for implementing the collaborative project.
